

Food Technology

THINK. DESIGN. CREATE. IMPACT.

Success in Food Technology is not measured by producing the "best" meal. It is demonstrated through thoughtful planning, informed decision-making, effective communication, design thinking, evaluation, and reflection.

HOW STUDENTS DEMONSTRATE SUCCESS

PLANNING

Research, investigate and set goals.

DECISION-MAKING

Make informed choices and justify them with evidence.

COMMUNICATION

Share ideas clearly and present professionally.

DESIGN THINKING

Create innovative solutions to real-world challenges.

EVALUATION

Test, evaluate and use data to improve.

REFLECTION

Reflect on learning and refine for future success.

Students learn to document their thinking, justify their choices, work collaboratively and present their ideas professionally—skills that prepare them for life well beyond the classroom.

ESSENTIAL SKILLS FOR LIFE

Critical Thinking

Problem Solving

Collaboration

Effective Communication

Real-World Understanding

THE FOOD TECHNOLOGY LEARNING PROCESS

WE EXPLORE REAL-WORLD FOCUS AREAS

Sustainability

Nutrition & Health

Food Systems

Emerging Technologies

Consumer Needs

Entrepreneurship

The Future of the Food Industry

Food Technology is an academic Technologies subject that develops students' ability to think critically, solve problems creatively, communicate effectively, collaborate with others, and design innovative solutions for real-world challenges.

Students investigate food systems, sustainability, nutrition, production, consumer needs, emerging technologies, entrepreneurship, and the future of the food industry. They plan, prototype, test, evaluate, refine, and justify their decisions using evidence and reflective thinking.

IT'S NOT JUST ABOUT THE FOOD WE MAKE, IT'S ABOUT THE THINKING BEHIND IT.

CAREER READY
Skills for future pathways.

CREATIVE INNOVATOR
Turn ideas into impact.

ANALYTICAL THINKER
Make informed decisions.

CONFIDENT COMMUNICATOR
Share ideas and inspire others.

Preparing students for a better future.
